Professional Summary

Computer Science Engineering student with hands-on experience in full-stack web development, AI-powered applications, and machine learning projects. Skilled in developing responsive web applications, integrating APIs, managing databases, and building practical software solutions using modern technologies. Passionate about software engineering, AI systems, scalable applications, and real-world product development.

Technical Skills

- Programming Languages: JavaScript, Python, C
- Frontend Technologies: HTML5, CSS3, React.js, Tailwind CSS
- Backend Technologies: Node.js, Express.js, Flask, REST APIs
- Databases: MongoDB, PostgreSQL, MySQL, Firebase
- Tools & Platforms: Git, GitHub, VS Code
- Authentication & APIs: JWT Authentication, Firebase Authentication, API Integration
- Core Concepts: Prompt Engineering, Responsive Web Design, Machine Learning Basics

Projects

MediAssist AI – Disease Prediction & Healthcare Guidance System

Tech Stack: Python, Flask, HTML, CSS, Machine Learning

- Built a machine learning-powered healthcare application capable of predicting diseases from user symptoms.
- Implemented the Random Forest algorithm using healthcare datasets for disease prediction.
- Developed a Flask-based backend and integrated responsive frontend interfaces.
- Added chatbot-based health guidance, reminder notifications, and email verification functionality.

Portfolio Website

Tech Stack: React.js, Tailwind CSS, JavaScript

- Developed a modern and responsive personal portfolio website to showcase projects, certifications, technical skills, and research publications.
- Built reusable UI components and responsive layouts using React.js and Tailwind CSS.
- Implemented clean navigation and interactive frontend sections for improved user experience.
- Optimized the portfolio for accessibility, responsiveness, and professional presentation.

PathForge AI – AI-Powered Career Guidance Platform

Tech Stack: React.js, JavaScript, Tailwind CSS, LLM APIs

- Developed an AI-powered career guidance platform that generates personalized career roadmaps based on user education, interests, hobbies, and career goals.
- Integrated LLM APIs to provide role-based guidance, structured learning paths, and skill recommendations.

- Built responsive and reusable frontend components using React.js and Tailwind CSS.
- Designed interactive user flows with a clean and modern UI focused on usability and accessibility.

Real-Time Chat Application

Tech Stack: HTML, CSS, JavaScript, Firebase

- Developed a real-time chat application inspired by WhatsApp Web with live messaging functionality.
- Integrated Firebase Realtime Database for instant message synchronization and real-time updates.
- Designed responsive chat interfaces for smooth and interactive user experiences.

Research & Publications

Offline AI-Driven Low-Resource Multilingual Tutoring Architecture for Rural Education

- Co-authored an architecture proposal research paper focused on an offline AI-driven multilingual tutoring system for rural education environments.
- Proposed a low-resource AI tutoring architecture designed to improve accessibility in underserved regions.
- Published as a research preprint on Zenodo with DOI indexing.
- DOI: <https://doi.org/10.5281/zenodo.20327212>
- Published: May 21, 2026

Certifications

- Career Essentials in Generative AI — Microsoft & LinkedIn Learning (2026)
- Atlassian Agile Project Management Professional Certificate — Atlassian & LinkedIn Learning (2026)
- Node.js Essential Training — LinkedIn Learning (2026)

Education

- Muffakham Jah College of Engineering and Technology — B.E. in Computer Science Engineering (2023 – 2027)
- Alphores Junior College — Intermediate (2022 – 2023) | Score: 980/1000
- Nawab's High School — S.S.C (2021) | CGPA: 10.0
